

The Bone, Joint and Muscle Trauma Group: Quarterly Bulletin

New from the Bone, Joint and Muscle Trauma Group in *The Cochrane Library*, Issue 2, 2009:

New protocols

- Manipulative interventions for reducing pulled elbow in children
- Oral non-steroidal anti-inflammatory drugs versus other oral analgesics for acute soft tissue injury
- Vitamin C for preventing complex regional pain syndrome (type I) after wrist fractures in adults

New reviews

- Conservative interventions for treating middle third clavicle fractures in adolescents and adults
- Interventions for preventing falls in older people living in the community

Issue 2, 2009
will be
published on
15 April 2009

Updated reviews

- Nerve blocks (subcostal, lateral cutaneous, femoral, triple, psoas) for hip fractures
- Osteotomy, compression and other modifications of surgical techniques for internal fixation of extracapsular hip fractures

Amended protocols

- Rehabilitation interventions for improving physical and psychosocial functioning after hip fracture in older people

Quality and Prioritisation

14th Annual Meeting of UK and Ireland-based Contributors to The Cochrane Collaboration Edinburgh

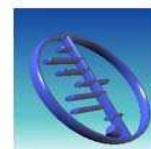

The 14th Annual Meeting of UK and Ireland-based Contributors to The Cochrane Collaboration will take place on Wednesday 18th and Thursday 19th March 2009 at the Edinburgh Conference Centre (Heriot Watt University).

The Meeting provides an opportunity for UK and Ireland based members actively involved with The Cochrane Collaboration to get together to learn, debate and network.
