

RevMan Web for non-Cochrane reviews

RevMan Web now available for institutions or individuals for generating one-off meta-analyses and forest plots or conducting their own systematic reviews.

What is RevMan Web?

RevMan Web is Cochrane's online systematic review platform. It helps authors to conduct systematic reviews—allowing them to structure and store study data, generate meta-analyses and communicate the results through forest plots and review articles.

With RevMan Web, you can:

- Generate meta-analyses and forest plots
- Use calculator to assist with data entry
- Structure and store study data (results, characteristics and risk-of-bias)
- Collaborate on writing the review article
- Access, compare and revert to any versions of the review
- Set up and manage review projects for intervention reviews, flexible reviews, overview reviews and methodology reviews

RevMan Web offers new features, including study-centric data (entering result data in the included studies) and review portfolio management tools.

Top 3 Reasons to use RevMan Web

Cochrane's online review-writing platform makes review production faster and easier!

It's easy

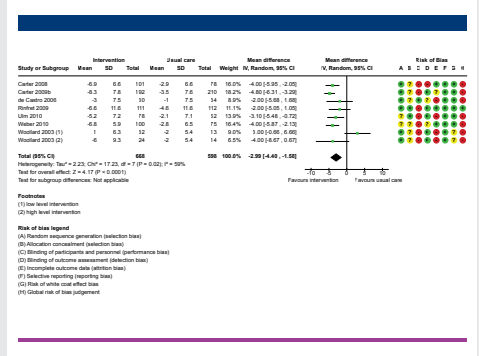

- Step-by-step creation of meta-analyses
- With an intuitive web interface
- Ideal for learning and training in systematic review techniques

It's convenient

- A safe, central place to manage all of your in-production reviews
- Portfolio management tools for project leads

It's up-to-date

- Continually updated, with new features added regularly
