

Choosing Wisely Canada

FREE WEBINAR:

From evidence of overuse to de-implementation- *challenges and gaps*

Cochrane Sustainable Healthcare and Choosing Wisely invite you to join our live webinar where leading experts discuss the challenges of abandoning existing low-value care practices, which may not be beneficial or even cause harm to patients.

The experts will share experiences on how to address the urgency of finding out when and how de-implementation, de-intensification of medical interventions, and diagnostics should be undertaken, without causing harm to patients, de-professionalizing clinicians, or counteracting shared decision-making processes.

AGENDA

4:00 – 4:10	INTRO , <u>MINNA JOHANSSON</u> , DIRECTOR, COCHRANE SUSTAINABLE HEALTHCARE
4:10 – 4:20	FROM EVIDENCE OF OVERUSE TO DE-IMPLEMENTATION , <u>WENDY LEVINSON</u> , CHAIR, CHOOSING WISELY
4:20 – 4:30	GAPS IN DEIMPLEMENTATION RESEARCH , <u>JEREMY GRIMSHAW</u> , IMPLEMENTATION RESEARCH LEAD, CHOOSING WISELY
4:30 – 4:50	FROM A GUIDELINE/POLICY PERSPECTIVE WHAT IS NEEDED? – <u>NIEK SIEDS KLAZINGA</u> , STRATEGIC LEAD HEALTHCARE QUALITY AND OUTCOMES, <u>OECD</u>
4:50 – 5:20	PANEL Q&A

Date: 10th October 2022

Time: 4pm – 5.30pm CET

How to register for the webinar: Sign up is freely open to anyone interested in evidence-based medicine and de-implementation research. The session is of relevance to healthcare professionals, policy makers, guideline developers and authors of primary research and evidence synthesis.

Please register to save your seat via Choosing Wisely's website on: <https://choosingwiselycanada.org/event/challenges-and-gaps/>

The recording will be live approx. 24 hours after the recording at the same link.
