

**Cochrane Methods
Co-Production**

2025

**Convenors: Alex Todhunter-Brown,
Maureen Smith, April English,
Nicole Pitcher**

Highlight: Completion of a prioritization exercise to determine Top Research Priorities relating to Co-production of evidence syntheses

Research and development

- Leading an international Delphi process to reach consensus on Top Research Priorities relating to co-production in evidence synthesis. Publication is in preparation.
- Contributing to the [MuSE-Evidence Syntheses project](#).
- Contributing to Evidence Synthesis International Collaborative.

Best practice and guidance

- Presented a poster focused on co-production in evidence syntheses at the Global Evidence Summit.
- Advocating and supporting Cochrane in change of terminology from “consumer” to “patients and the public”.
- Distributing regular newsletters, signposting new evidence, publications and training opportunities in this field

Methods implementation

- Advising Cochrane during their development of new mandatory reporting requirements for consumer involvement in Cochrane systematic reviews (this may include researchers, patients and members of the public, or other professionals, such as policy makers or commissioners).
- Supporting Cochrane’s plans to update the Cochrane Handbook to adequately address patient and public involvement and methods of co-production.
